CAREER OBJECTIVE

Full Stack MERN Developer with 2+ years of Angular development experience and hands-on MERN stack training (MongoDB, Express.js, React.js, Node.js). Builds scalable, high-performance web applications and translates business requirements into clean, maintainable, user-focused code.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, TypeScript, Angular, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend & Database: Node.js, Express.js, REST APIs, : MongoDB, Mongoose, SQL

WORK EXPERIENCE

Frontend Developer – Rhibhus Infosystem Pvt Ltd, Bengaluru

Mar 2020 – Jan 2021

- Developed and maintained responsive Angular interfaces with backend API integration and dynamic components.
- Enhanced features and resolved application issues, collaborating cross-functionally to improve usability and performance.

Front End Developer – Intact Green Services Pvt Ltd, Bengaluru

Mar 2019 – Feb 2020

- Built reusable UI components with HTML, CSS, and Angular, speeding up new feature integration by 30%.
 - Integrated REST APIs and resolved UI defects in coordination with development and QA teams.
-

PROJECTS

Pet Adoption Platform – MERN Full Stack | [GitHub](#) | [Live Demo](#)

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, Cloudinary

- Engineered a full-stack, role-based adoption platform enabling shelters to list pets and adopters to browse, apply, and message directly, with an end-to-end adoption workflow (application → review → status tracking).
- Built secure JWT authentication with distinct adopter/shelter roles and protected routes; integrated Cloudinary for optimized image uploads, real-time messaging, and a review/rating system.

Expense Tracker – MERN Full Stack | [GitHub](#) | [Live Demo](#)

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack personal finance management app with secure JWT authentication and protected RESTful APIs.
- Built dynamic category-based filtering, search, and spending summaries using MongoDB aggregation pipelines, with a responsive, type-safe React/TypeScript UI.

Book Management System – MERN Full Stack | [GitHub](#) | [Live Demo](#)

Tech Stack: React, TypeScript, Node.js, Express.js, MongoDB, JWT

- Built a full-stack library management application supporting book search, category-based organization, and a complete borrow/return workflow with historical tracking.
 - Implemented secure JWT authentication and role-based access control, with a normalized MongoDB schema for book inventory, borrow records, and user activity history.
-

INTERNSHIPS

Full Stack Web Developer Intern – Aitron

Sep 2018 – Feb 2019

Assisted in developing, debugging, and integrating features across frontend and backend components.

Java Frontend Intern – Human IT Pvt Ltd

Dec 2017 – Mar 2018

Supported frontend development, debugging, and application testing using Java-based web technologies.
